

StrokeNET Site Renewal Report

Data as of January 17, 2023

Metrics in this report

Metric	Definition	More Details
Number of enrolling sites	Number of sites participating in the study.	A site is counted if it has ever been released to enroll, regardless of current status.
Days to site activation	Time from site notification to site activation.	Site notification is defined as when the IRB packet was sent or when the site was contacted. Site activation is defined as released to enroll study participants. This metric is not available for SATURN-MRI, DEFUSE3, Telerehab, CREST2, and CREST-H since site notification date and/or site activation date are not captured for these studies.
Days to first subject randomized	Time from site activation to first subject enrolled in the trial/study.	Site activation is defined as released to enroll study participants. This metric is not available for SATURN-MRI, CREST2, and CREST-H since site activation date is not captured for these studies.
Total randomized	The total number of subjects enrolled and then randomized into the trial/study.	For SATURN-MRI and VERIFY, this is counting number of subjects enrolled rather than randomized.
Total enrolled (consented)	The number of enrolled subjects consented for screening eligibility prior to randomization in the trial/study.	Only included for studies that include a two-step process for enrolling subjects into the trial/study.
Monthly randomized rate	The monthly enrollment rate of subjects in the trial/study. Note the "Average monthly randomized rate per site" is calculated by taking the average of the sites' monthly randomized rate.	Calculated as total randomized divided by days since released to enrolled. For SATURN-MRI and VERIFY, this is counting the number of subjects enrolled rather than randomized. This metric is not available for CREST2 and CREST-H.
Retention rate	Percentage of subjects completed study (including death) or currently in study for all projects, excluding CREST2 and CREST-H.	This is calculated as # of subjects retained divided by total # of enrollment. Retained is defined as subjects not terminated due to being lost to follow-up, consent withdrawal, or reasons other than study completion or death. To calculate the overall retention rate, sum up the total # of subjects retained, then divided it by the overall # of subjects enrollment. Total # of enrollment does not include CREST2 and CRESTH enrollment numbers. This metric is not available for CREST2 and CREST-H.
Percentage of CRFs submitted within window	Percentage of CRFs submitted on time.	# of CRFs first submitted within the submission window divided by (Number of required CRFs and data entered optional CRFs, excluding central reader/assessor CRFs minus the number of CRFs not first submitted within the submission window) * 100 This metric is not available for SATURN-MRI, CREST2, and CREST-H.

Section 1: Summary Tables for each RCC

Overall Summary for Case Western (RCC #1)								
Trial Name	# of Enrolling Sites	Average days to site activation (min, max)	Average days to first subject randomized (min, max)	Total randomized	Average monthly randomized rate per site (min, max) ¹	Total enrolled (consented) ²	Retention rate	Percentage of CRFs submitted within window
ARCADIA	10	226 (56, 455)	172 (36, 383)	25	0.11 (0.04, 0.22)	101	80.0 %	67.9 %
ARCADIA-CSI	2	332 (158, 505)	156 (10, 301)	8	0.14 (0.04, 0.23)		87.5 %	64.6 %
SleepSMART	4	387 (150, 585)	176 (67, 420)	19	0.15 (0.04, 0.25)	93	84.2 %	68.6 %
