Reminders

- Please be sure you are reporting AE's in WebDCU. If you can't remember what is reportable, you can refer to the Data Collection Guidelines under F104 Adverse Events or in the MOP under section 16.
- Those who decline informed consent should be logged into WebDCU under Study Progress tab > Screen Failure Report
- Questions about how to fill out CRFs? Please contact Faria or Jocelyn- their contact info is below
- If the discharge visit comes before the randomization visit, in WebDCU – mark both visits with the randomization visit date and then in the F123 Hospital Discharge, mark in Q01 the actual date the subject was discharged
- Batteries can now be ordered through KOEO
- When you are in KOEO configuring the Nox T3- do not enter PHI. See page 3 of the "FusionHealth Configuring the T3 in KOEO MOP" for detailed instructions
- We will be organizing FusionHealth workshops for coordinators, so they can get hands on experience with study equipment. More information to come shortly
- Have webinar ideas or topics you want to see covered? Let us know!

FAQ:

Why am I getting a notice for a protocol violation after I enter a screen failure on the CPAP Run In Night CRF?

This is done to flag to the programmers that randomization is being blocked- it does not mean you caused a Protocol Violation (PV).You can type a response to the PV by clicking on the blue pencil icon underneath it. This will allow you to save and submit the CRF. This will eventually be changed in WebDCU to not produce a PV.

Our next webinar will be 7/31 at 1:30 ET. Calendar invites were sent on 7/12
